Epson continues to set the benchmark for printing and is excited to introduce some amazing new products. Our range of printers offers **quality**, **speed** and **low cost** production. Whether you are starting out, want to expand your product offering or simply upgrading, we've got you covered.

Take this unique opportunity to view our range of solutions for signage, dye sublimation, direct-to-garment, and technical printers. Our team have created some product videos to take you up close and personal with some of their key features and benefits. Don't forget to take some time and check them out.

## SureColor S60660L

Produce durable high-impact images quickly, easily, and at reduced cost. The SureColor S60660L is compatible with wide range of media from vinyl and film, to canvas and paper. It suits applications including outdoor signs and banners, screens and shades, vehicle wraps and decals, wall and floor finishes, canvas pull ups and Point of Sale material. With addition of a 3rd party cutter it can even be used for label production.

- Dual CMYK ink set with extended gamut , enhanced brightness and super-fast drying characteristics
- Up to 1440 x 1440 dpi with advanced VSDT and Epson Precision Dot Technology for outstanding image quality with a high-gloss finish
- Supports print speeds up to 95 m2/hr with auto head cleaning and same day lamination
- DUAL print heads, 12L Bulk Ink Supply System, and integrated Auto-Take-Up, for efficient sheet and roll based production
- Produce better quality prints with a much lower production cost than traditional signage printers, all backed with a comprehensive 'heads-n-all' warranty

## SureColor F3060

Produce high-quality customised garments and merchandise quickly, easily, and at minimum cost. Designed for medium to high volume production, the SureColor F3060 combines superior speed with extended durability, and a lower Total Cost of Ownership (TCO). Produce T-shirts, Polo-shirts, bags, and caps, and more.

- CMYK + White Ink set
- Up to 4 times faster than traditional DTG printers
- Advanced platen design with auto height adjustment for fast loading
- 9L bulk ink and 4L waste systems enable continuous and cost-effective production
- Dual 2.6" PrecisionCore print heads enable high-speed single-pass colour + white prints
- Auto nozzle status monitoring auto head and cap cleaning ensure high quality imaging with minimal wastage
- Supplied complete with easy to use production and job costing software, runs off a standard 240V power supply
- Advanced Linear Motion Guide carriage system and heavy duty motors enable durable operation , all backed by a comprehensive warranty with service cover extendable to 5 years

## SureColor F9460H

Produce durable high-impact fabrics quickly, easily, and at reduced cost. The SureColor F9460H is a high performance Dye Sublimation printer that combines high-speed operation, with outstanding image quality, and easy maintenance. It suits a wide range of applications including custom fabric, clothing, and signage production.

- Dual CMYK ink set with extended gamut and enhanced brightness
- Optional Fluorescent Yellow and Pink inks can be combined with the standard colours to enhance impact and gamut even further
- Up to 1440 x 1440 dpi with advanced VSDT and Epson Precision Dot Technology for outstanding image quality
- Supports print speeds up to 108.6m<sup>2</sup>/hr with auto nozzle status monitoring and head cleaning
- DUAL print heads, Bulk Ink Supply System, and integrated Auto-Take-Up, for efficient sheet and roll based production
- Supplied complete with software, can be run off a standard 240V power supply, and suits operation in a warehouse or air-conditioned office environment
- Comprehensive single-source warranty and service cover extendable up to 5 years

## SureColor 560/561

Make merchandise magic with the SureColor F560. This printer brings Dye Sublimation to the desktop in a compact package that is affordable, easy to use, and cost effective to run. Its flexible design suits in-house production of a wide range of goods including customised shirts, mugs, photo merchandise, soft and hard signage.

- Supports sheet & roll media up to 17" wide complete with a sheet feeder
- Ink tank system enables production with a low running cost and has 2 ink set options; standard (F560) or Fluro (F561)
- Both ink sets produce high quality images that are bright with an extended gamut
- Integrated auto-cutter enables operation with a sheet based heat-press
- Supplied as a complete package with software, media and ink. Optional stand available.
- Simple to use, easy to maintain, and backed with comprehensive single-vendor service cover

## SureColor T5460M

Why just purchase a printer when you can get a complete Large Format Imaging System for under \$8.5k inc. tax with a comprehensive 5 year on-site service. The SureColor T5460M offers the ultimate solution for business, government and education. It combines a fast print mechanism with a high resolution scanner to facilitate full colour document reproduction. Whether you are producing plans, sales documents or posters this is the printer for you. It features a very low running cost and outputs durable prints that are resistant to damage through abrasion and moisture exposure.

- Print, scan, copy, and share documents up to 36"/A0
- All pigment ink produces high-quality prints that are bright and durable
- Advanced CCD recognises positive & negative images complete with Fluro mark-ups
- Uses cost-effective 350ml max ink carts and features ultra-low power consumption
- Compact & easy to operate with print heads that don't require regular replacement

Register your interest and our friendly Epson team will be in contact to discuss more about the products and offerings.

### ADVANCED PRINTHEAD TECHNOLOGY

MicroPiezo is an exotic, unique printing technology, developed by Epson. Its legendary performance, combined with its ability to support virtually any ink chemistry, has forever changed inkjet printer design. As a result, Epson is not driven by the technology, but uses its advanced technology to make possible what was considered impossible.

Epson's latest PrecisionCore print heads deliver outstanding image quality with maximum reliability using the minimum amount of ink. Unlike competing technologies which wear and change over time, PrecisionCore print heads are designed to produce the same output, day after day, with superior colour that is predictable and consistent. While some competitor heads are consumable parts that need to be regularly replaced with associated costs and downtime, Epson PrecisionCore print heads are permanent and covered under warranty.

### EPSON® SURELAB™ SERIES

The Epson® SureLab™ series is designed to enable fast and cost-effective photo production. They suit a range of applications including in-house imaging, studio and event imaging, Kiosk and Print-For-Pay operation. They produce durable high quality photo prints and can also be used for a range of value-added material including business and greeting cards, invitations and awards, menus and brochures. They have a lower running cost and output better quality than alternative Dye Sublimation technology. Unlike traditional Silver Halide equipment, they employ no chemicals, require no special handling, maintenance or waste disposal. They are easy to operate, require minimum space, and consume very little power.

## Epson Media

It's a magical moment when a blank sheet of paper is transformed into a print. Epson offers an extensive range of Photo, Fine Art, Production, and Specialty media in roll and sheet format. We take a quality base stock and apply a set of specially formulated coatings. The coatings are designed to work with nominated Epson printer and ink types to enable output with superior clarity, brightness, and colour accuracy. Please check the Epson web site for product compatibility and specification details; [www.epson.com.au](http://www.epson.com.au)

- 3 Premium Photo Paper
- 3 Presentation Paper
- 3 Proofing Paper
- 3 Technical Paper
- 3 Synthetic Paper
- 3 Canvas
- 3 Board
- 3 Film

## Exceed Your Vision

As one of the world's most respected performance imaging companies, Epson has set the benchmark for print quality. And in many ways, the products shown in this range guide represent some of the most advanced forms of imaging ever developed.

This is what defines us. In short, it is the way in which we combine engineering and innovation, performance and everyday reliability.

From printing the most intricate photograph to the most precise architectural drawing, no other company has been so focused on developing imaging technology that inspires people to do amazing things.

### EPSON® SURECOLOUR™ T-SERIES

Epson's technical printers are designed to produce posters, POS, plans, drawings, maps, CAD, GIS and presentation material. Developed for business, education and retail applications, they are simple to use and feature low power consumption. They output ultra-fine lines and solid fills, with high brightness and colour density, using inexpensive ink that dries almost instantly to become moisture and abrasion resistant. They can be operated stand-alone or as part of a network complete with the latest security support. Most models feature scanner support (desktop &/or Large Format), while some provide job costing, remote management, optional Postscript and print server functionality.

### EPSON® SURECOLOUR™ S-SERIES

Epson's range of signage printers are designed to enable cost-effective durable imaging on a wide range of substrates. The combination of Epson Ink, Print Head, and image processing technology, enables production of material with truly exceptional quality. Our basic 4 colour models produce output that is equivalent or better than competitors with 7 or more inks and the ultimate in colour we have our S80 series with up to 10 inks and PANTONE™ certification.

## EPSON® SURECOLOUR™ F-SERIES

Epson's range of fabric printers are designed to enable flexible production on a range of natural and artificial fabrics. Dye Sub variants can also be used for imaging onto materials that have been pre-treated or will accept a polyester spray. While most models only use a 4 colour ink set, the high grade formulation, in conjunction with Epson Print Head and image processing technology, enables output with a very high tonal depth, colour gamut, and brightness level.
